**For Immediate Release****Long Grove Pharmaceuticals Launches Carboprost Tromethamine Injection, USP**

*FDA-Approved Generic Expands Healthcare Options for Women, Continues Rapid Expansion for Emerging Generics Leader*

**ROSEMONT, Ill.** – [Long Grove Pharmaceuticals®](#), founded in 2019 by strategic health care investor Water Street Healthcare Partners, today announced the launch of its second generic to market, Carboprost Tromethamine Injection, USP. The FDA-approved generic is now available.

Carboprost Tromethamine Injection, USP is AP Rated and is therapeutically equivalent to Pfizer’s Hemabate®. Long Grove Pharmaceuticals strives to provide differentiated generics to the market. Carboprost Tromethamine Injection, USP is available in a vial presentation, is TAA Compliant and made in Canada.

“The launch of Carboprost Tromethamine Injection continues Long Grove Pharmaceuticals’ commitment to rapid development of differentiated generics,” said Dan Robins, Ph.D., President & CEO of Long Grove Pharmaceuticals. “Our team has deep experience navigating the complex regulatory landscape and supply chain. We remain focused on bringing even more products like this to market as our portfolio expands.”

Long Grove Pharmaceuticals’ Carboprost Tromethamine Injection, USP marks the second product launch for the company in 2022 as it continues to emerge as a new U.S. generic pharmaceuticals leader. The company focuses on complex generics, including injectables and topical products, and is committed to improving customer choice while increasing access for patients.
